

innovation | quality | service

**process automation**

IT infrastructure for system and plant integration: **Industry 4.0**

- robotic production line
- automatized feeder of the plate
- end of cycle edge machines
- robotic packing system

- optimization of the production line
- increase in productivity
- improvement of the quality
- energy saving

**clean&green**

**environment** and working conditions of our **employees care**

safe and healthy workplace

reverse osmosis demineralization water washing machine

closed circuit plant for machinery cooling

constant commitment to ensure safety at work
